Logic Model Summary

Anchors in Resilient Communities

ARC Activities	Outcomes 0-5 years	Outcomes 5-10 years	Outcomes 10-20 years	Vision

ARC Activities

- Facilitate partnerships.
- Create co-learning opportunities.
- Mobilize Projects.
- Scale the model.

Outcomes 0-5 years

- Increased capacity within community to provide goods and services to and work at anchors.
- Increased willingness and capacity within anchors and community to collaborate for health, wealth, and resilience.
- Increased evidence that ARC model supports anchor mission and bottom line and community health, wealth, and resilience.

Outcomes 5-10 years

- Increased access to good jobs and capital for locally-owned businesses. Increased community ownership and social enterprise.
- Increased access to social and economic determinants of good health and well-being.
- Decreased GHG emissions due to increased local procurement by anchors.
- Increased hiring, purchasing, and investing by anchors in community.
- Authentic, trusting relationships between anchors and communities.
- Increased awareness among anchor leadership across the U.S. that community development can be part of their mission and support business goals.

Outcomes 10-20 years

- Decreased poverty rate, income inequality, and unemployment rate. Increased job retention. Increased wealth retention in the community.
- Decreased chronic disease rates and increased well-being for people experiencing health inequities.
- Creation of decentralized, community-owned regional networks for critical community needs (e.g., food, energy, water)
- Anchors become system integrators.
- Regions across the United States adopt the ARC model for anchor-community partnership for health, wealth, and resilience.

Vision
